<b>Description</b>			
If you define a 1:1 NAT rule with a destination IP (source/destination match) this destination IP may be an alias. In the overview table this alias is not shown as the usual link to the target alias object. Working good example of the desired behaviour is the firewall rules overview.			
Affected version:			
2.4.0-BETA (amd64) built on Mon Jul 10 13:15:04 CDT 2017 FreeBSD 11.0-RELEASE-p10

##### #5 - 09/15/2017 02:50 PM - Jim Pingle

- Status changed from Feedback to Assigned

- Target version changed from 2.4.0 to 2.4.1

I still don't see alias details when using an alias as a destination. Just the word, no special formatting/display/link.

Not critical, moving forward.
